CUBES RANGE / BACON / STRIPES / STAMPS

# MDB02

Machine designed to dice lardons out of cylindrical blocks composed of reconstituted meat.

The distinction between waste and good products is done automatically thanks to a specific belt.

**Productivity:**  
2 100 kg/h for 6kg cylinders.  
**Loading capacity:**  
8 cylinders of 950 mm long.

**The productivity information is only indicative. A study can be made with your specifications.**

This material is in conformity with the following directives and bills:  
Food contact: EC1935/2004,  
Good manufacturing practice: EC2023/2006,  
Machines: EC2006/42, CEM : EC 2004/108

- This machine offers a top-quality cutting.
- The loading device offers a capacity of 8 cylinders of meat. This machine does not require staff for a constant loading.
- The machine uses the EMSENS patented cutting device with 6 cutting tools by disk.
- The MDB02 is a machine designed to dice over 2100 kg of bacon stripes / hour (calculation based onto a cylinder of 6.0 kg / unit).
- The exit of the products is done thanks to a vibrating belt.
- Working station to optimize the movements and moving of the operators.
- The machine is easy to clean and takes into account the constraints of the food industry.
- A touch screen makes the communication easier between the operator and the machine. The screen includes a self-diagnostic system displaying a picture of the faulty component for example.
